

Final Project

Design Reservation System

This project was based on creating an airline ticket reservation system.

- 1 Database , User table. Flight table . (10 seats each flights)
- 2 Create User class (Username, email, phone number
- 3 Create Flight class

You should implement feature blow by rest api

User can check how many seats still available. User can book seat with seat number. User can update seat number. User can do cancellation.

Do whatever you want. Open to all solutions.
